- [House of Worship](#)
- [24-hour Alternative Coverage](#)

Is the total
workspace
over 7,000
square feet?

Yes

No

Is the MLTS for
a single
building?

Yes

No

Does it occupy
a single floor?

Yes

No

Is the building
less than
20,000 square
feet?

Yes

No

Are there less than 20 communications devices on the MLTS?

Yes

No

Do the buildings
all have the same
physical address?

Yes

No

Is the workspace located on a single floor in the separate buildings?

Yes

No

Is the MLTS covering more than one floor in the separate buildings with separate addresses?

Yes

No

The MLTS must identify the specific location of each communications device, including the street address.

When does this need to happen?

The MLTS must deliver the specific location of each communications device, including the street address and building floor, to 911. This must be in effect by December 31, 2020.

[Further Information](#)

[Start Over](#)

The MLTS must give the specific location of each communications device in each building, in addition to the street address and any unique building identifiers if applicable.

When does this need to happen?

[Further Information](#)

[Start Over](#)

The MLTS shall identify the specific location of each communications device in each building, including the street address, building floor and any unique building identifier if applicable. This must be in place by Dec 31, 2020.

[Further Information](#)

[Start Over](#)

The MLTS must deliver the specific location of each communications device in each building, including the street address and any unique building identifiers if applicable to 911. This must be in place by December 31, 2020.

[Further Information](#)

[Start Over](#)

This must be in effect by
December 31, 2020.

[Further Information](#)

[Start Over](#)

This must be in effect with
the installation of a new
MLTS after January 1, 2020.

[Further Information](#)

[Start Over](#)

The MLTS is not required by law to provide specific device location information to 911. The MLTS must provide the building address. It is recommended that if the specific location information configuration is available with the MLTS to implement this feature.

Farm Definition

- “Farm” means the land, plants, animals, buildings, structures, including ponds used for agricultural or aquacultural activities, machinery, equipment, and other appurtenances used in the commercial production of farm products.
- A farm does not include a farm producing or selling any product or crop that is unable to be sold in interstate commerce.
- Does the farm for the MLTS in question meet the definition of a farm as provided?

Yes

No

Does the farm
have less than
twenty
communications
devices located
within one
building?

Yes

No

The MLTS operator shall identify the specific location of each communications device, including the street address. The MLTS operator is exempt from providing the specific location of each communications device until the installment of a new MLTS after January 1, 2020.

Farm
Exemption

House of Worship Definition

- Houses of public worship, with the land on which they stand, the furniture therein and all rights in the pews, and any parsonage owned by a religious society of this state and occupied as a parsonage. Houses of public worship includes buildings or other facilities owned by a religious society and used predominantly for religious services or for teaching the religious truths and beliefs of the society.
- The exemption provided under this subsection does not extend to a school controlled by the house of worship at the same address.
- Does the House of Worship meet the definition provided above?

Yes

No

House of
Worship

Is the MLTS for
a single
building?

Yes

No

House of Worship Single Building

Are there less
than 20
communications
devices?

Yes

No

The MLTS operator shall identify, at a minimum, the street address.

An MLTS operator is exempt from providing the specific location of each communications device until the installation of a new MLTS purchased after January 1, 2020.

The exemption provided under this subsection does not extend to a school controlled by the house of worship at the same address.

House of
Worship,
multiple
buildings, more
than one street
address, less
than 20
communications
devices.

24-Hour basis alternative notification exemption

[Further Information](#)

[Start Over](#)

- An MLTS operator is exempt from the specific location identification requirements under this section if the building maintains, on a 24-hour basis, an alternative method of notification and adequate means of signaling and responding to emergencies including, but not limited to, a communications system that provides the specific location of 9-1-1 calls from within the building or the building is serviced with its own appropriate medical, fire, and security personnel.
- Alternative methods of notification means that an internal system exists that will locate the communications device used to make a 9-1-1 call and initiate an emergency response.

Definitions

- Communications device means a device that is integrated into the design and operation of the multiline telephone system and by using the multiline telephone system is capable of accessing, connecting with, or interfacing with a 9-1-1 system, exclusively through the numerals 9-1-1, by dialing, initializing, or otherwise activating the 9-1-1 system through the numerals 9-1-1 by means of a local telephone, cellular telephone, wireless communications device, interconnected voice over the internet device, or any other means.
- MLTS means a system comprised of common control unit or units, telephone sets with unique telephone numbers, and control hardware and software
- MLTS operator means a service user who owns, leases, or rents from a third party, and operates an MLTS
- Specific Location means a room or unit number, or room name, or equivalent, unique designation of a portion of a structure or building to which a 9-1-1 emergency response team may be dispatched, and the caller quickly located, that is not more than 7,000 square feet.
- Work space means the physical building area where work is normally performed, measured by net square footage, including offices; production, warehouse, and shop floors; storage areas; hallways; conference rooms; break rooms; and other common areas. Work space does not include wall thickness; shafts; heating, ventilating, or air conditioning equipment spaces; mechanical or electrical spaces, or similar areas where employees do not normally have access.
