Berrien County Health Department Statement on Announcement of Michigan Moving to Next Phase of COVID-19 Vaccination

Health Department Asks for Patience as Planning is Ongoing for Priority Populations

(Benton Harbor, MI) --- Today, the Michigan Department of Health and Human Services (MDHHS) announced the state is moving to a [new phase of vaccination](#) as of Monday, Jan. 11. In communities that have an adequate supply of COVID-19 vaccines, local health departments and healthcare systems have been authorized to move forward with vaccination of residents age 65 and older, frontline essential workers including police officers, first responders, jail and juvenile center staff; and preK-12 teachers and childcare providers.

At this time, Berrien County does not have the immediate vaccine supply to support vaccination for all individuals in these groups. In order to make the most efficient use of the limited supply of vaccine that is allocated to Berrien County from MDHHS, Berrien County Health Department (BCHD) will be continuing to focus on vaccinating those in Phase 1A while also adding in additional priority groups when possible. While vaccine supplies are still very limited, there are robust plans in place to continue expanding vaccine clinic opportunity into the coming weeks to accommodate additional priority populations. At this time, clinics are by invite-only and are not walk-in vaccination clinics open to the general public.

In coordination with MDHHS and hospital partners at Spectrum Health Lakeland, planning is ongoing to increase vaccine availability for this next phase of priority populations in Berrien County. While not yet launched at this time, BCHD plans to have a pre-registration process for individuals to indicate their interest in receiving the vaccine. BCHD urges the community to remain patient as efforts are ongoing to ensure adequate vaccine availability for all those who are interested. More information will be released about a pre-registration process and vaccine appointment availability as soon as possible.

More information about the process for vaccination in Michigan can be found at Michigan.gov/COVIDVaccine or at www.bchdmi.org/COVID19.
