Township Match Program and Local Road Projects Table

Township Match Program and Local Road Projects Table

The table below shows the anticipated funding amounts that will be spent on local road improvement projects for the upcoming year, 2019. This does not include funding of routine maintenance activities such as snow removal, mowing, and pothole patches, among others. BCRD’s contributions are split between the primary and local roads with approximately \$7 million going towards improvements to the primary roads, and \$1.5 million added to the township contributions for a total of approximately \$4 million to be spent on the local road network. BCRD’s township contribution match formula is based on various statistics, including the amount of lane miles within each township.

Projects were planned for the upcoming three years for the local network based on the expected Township budgets. A map highlighting the proposed projects on local roads for each township can be found in Appendix C. A table listing the projects can be found below. These are subject to change based on township funding level changes.
